With more than 14,000 students and nearly 4,000 collaborators, professors and researchers, ideally located on the shores of Lake Geneva and in the city centre, the Faculty of Biology and Medicine (FBM) of the University of Lausanne and the Centre Hospitalier Universitaire Vaudois (CHUV) are inviting applications for a position of:

**Head of the skin mycology Laboratory and associate Professor**  
**Service of dermatology and venereology at the Department of medicine**

**Starting date**: 1st January 2019 or as agreed  
**Place of work**: Lausanne, Switzerland

The Service of dermatology of the CHUV offers overall cares for various dermatological diseases through specialized consultations (psoriasis, skin cancer, dermatological surgery, dermatooallergology, pediatric dermatology). In the field of basic research and diagnosis of cutaneous mycoses, the mycology laboratory has acquired a certain leadership at a national and international level and the results of applied research have allowed a rationalization of the routine and an increase in the quality of our analysis results returned to the physicians. The laboratory is divided into two parts: one for the analysis service (routine) and the other for our research activity. The research works involve a basic research activity aimed at understanding treatment resistances and virulence factors, as well as a translational research activity to analyse the skin's microbiota and understand its role in skin diseases.

**The main tasks in the position include:**
- lead the laboratory by adapting the organization to implement a policy that includes activities development, risk management and quality management,
- manage and supervise the mycological analysis of the routine laboratory by supervising the staff,
- ensure and improve the development of new techniques in mycology dermatology (including detection of therapeutic resistances) in accordance with usual practices and provisions,
- develop a cutting-edge research linking clinical activity and basic research in the field of skin microbiota, including dermatological mycology, at an international level and funded by external assessed funding,
- participate and guarantee postgraduate and continuing training missions for clinical succession by planning resources and developing ad hoc projects,
- Ensure the outreach of the Unit at a regional, national and international level.

**Desired Profile:**
- MD or MD-PhD title,
- specialist in dermatology title (ISFM or equivalent),
- experience in dermatological mycology and/or microbiology of the skin,
- advanced managerial skills (teams and projects management),
- academic rank knowledge with proven teaching practice,
- ability to develop an independent and internationally recognized research line funded by assessed funds,
- ability to interdisciplinary and network collaboration,
- good knowledge in French (or the ability to acquire it quickly) is essential for this position.

Preference will be given to a personality open to communication and cooperation, able to stimulate young colleagues destined for an academic career.

Further information can be obtained from Prof. Michel Gilliet, Head of the Service.

Applications should include a cover letter, a curriculum vitae, a list of scientific publications with a copy of the five most significant papers, a list of external funding obtained, a brief description of the research program, copies of diplomas. They must be sent as a single PDF file to June 23th 2018 at wwwfbm.unil.ch/releve/application/.

The job description is also available on the same link (or QR code).

Seeking to promote an equitable representation of women and men among their staff, UNIL and CHUV encourage applications from women.
