

REQUEST FOR EXTENSION OF MASTER'S DEGREE (MODULE 4)

Select your Master to show the deadlines: BEC MLS MB HT

The extension of the duration of a master's thesis (Module 4) is an exceptional measure, taken by the Council of the School of Biology for justified demands only.

The decision to extend must be justified jointly by the student and the Director, for valid reasons (significant delay in the collection and/or analysis of data, e.g. due to prolonged absence, inability to access certain measuring equipment or materials, certain data, etc.).

Given the regulatory deadlines (Art. 39 of the relevant master's study regulations) for the assessment of master's work (Module 4), with submission of the written master's thesis no later than 5 weeks before the start of the following semester, the request for extension must reach the School of Biology **at least 10 weeks before the deadline for submission of the dissertation, i.e.:**
