

Do you wish to

share and develop innovative approaches in the
health care of young people ?

upgrade your teaching and advocacy skills in the
field of adolescent health?

17th EuTEACH international summer school

July 7th – 12th 2024

Lisbon, Portugal

www.euteach.com

Aims

The main purpose of the summer school is to enable participants to **implement innovative approaches in the health care of young people and in teaching in the field of adolescent health**

Objectives

- Use the power of **collective intelligence** to enrich your skills and knowledge in adolescent health & to enhance creativity in the development of projects
- Implement **interactive & innovative methods** in your teaching practice
- Demonstrate awareness of **fundamental attitudes** pertaining to the care of young people through reflective practice

Target audience

- Health professionals working with young people
- Professionals with current or future teaching responsibilities in the field of adolescent health
- Professionals involved in public health, policy making and advocacy for young people
