**NEUFO Mini-Symposium** on May 29, 2017 @ 11h

**Title**: Translational investigation of schizophrenia: the 22q11 genetic model

**Organizers**: Alan Carleton & Alexandre Dayer, **CMU UNIGE**

**Location**: CMU Geneva, room C07.1732

0.5 ECTS with term paper; else 1 entry on LNDS seminar sheet

**Description**

The NEUFO mini-symposium series usually consist of three talks centered on a particular topic (see title). Attendance is free. For LNDS students, the participation to local symposia or national conferences usually warrants entries on a “seminar sheet” (12 entries = 1 ECTS) as these events do not provide the possibility to assess students’ learning achievements. However, the organizers of the NEUFO mini-symposium provide students with the possibility to submit a post-symposium term paper.

**Credit validation and instructions for post-symposium term paper**

- During the symposium, put your name on the participation list the LNDS coordinator will send to organizers and sign it
- Write a mail to "lnds@unil.ch" with the subject “NEUFO” indicating that you will write a term paper and **submit by June 30** (by mail to "lnds@unil.ch")
- All submitted papers will be collectively forwarded to the respective mini-symposium organizers for evaluation

- In your term paper (1-2 pages long; please provide your name, the talk title your paper is referring to, as well as bibliographic references for your arguments in case applicable) you can either
  a) critically discuss one of the symposium talks in face of other controversial research findings  
     OR
  b) put one of the symposium topics in context with your own research  
     OR
  c) develop a small project proposal based on a symposium topic sketching your ideas on what could be done in future studies.
