

We invite applications for a

Doctoral Student

at the Institute for Work and Health (Institut de Santé au Travail, IST) for the project

Music performance anxiety from the challenge and threat perspective: psychophysiological and performance outcomes

The IST is a non-profit higher education and research institute in Epalinges-Lausanne devoted to occupational health. The IST is associated with the universities of Lausanne and Geneva.

This 4-year research project, funded by the Swiss National Science Foundation, aims to investigate the phenomenon of music performance anxiety in university music students from the perspective of the biopsychosocial model of challenge and threat. The focus of the project is on the relationships between cognitive, emotional, physiological and performance-related manifestations of MPA.
