Workshop on the topic "mutation(s)" by the Interfaculty Plateforme for Gender Studies, University of Lausanne

considering "mutations"

monday, 3 octobre 2016
Musée de la main UNIL-CHUV
Rue du Bugnon 21
Lausanne
13h-17h

Access:
M2, station CHUV

how gender studies may contribute to improve undergraduate education in medical school?

Four conferences will deal with the challenge of implementing a gender-perspective into undergraduate medical education. The session will start with a theoretical and conceptual account and end up with feed-backs from similar projects at a European scale.

Free entrance without inscription

considering "mutations" how gender studies may contribute to improve undergraduate education in medical school?

From the 90's, many voices have arisen asking to pay a greater attention to the impact of gender in medicine. This rise of awareness has led to the diffusion of several guidelines and calls to action, including the OMS Gender Mainstreaming, the Gendered Innovations Stanford, and the European Gender and Medicine project.

In Lausanne, this growing rise of awareness in the medical community is a starting point for acting toward a better integration of gender at a practical level in medical education. This project faces the challenge of engaging professionals who are not accustomed to gender analysis in shifting their actual practice and including a gender-sensitive perspective.

This conference session aims to explore the practical aspects of implementing a gender perspective into undergraduate teaching in the Medical School of Lausanne. The conference will discuss the challenges, strategies and experiences in shifting teaching practices of medical school in a way that allows a transverse integration of a gender perspective.

13H00 - 13H15 **Why gender matters in medicine?**

Dr. med. Carole Clair, University of Lausanne, Switzerland
Aurélien Georges, University of Lausanne, Switzerland

13H15 - 14H00 **Gender-sensitive teaching in medicine - approaches and perspective for evidence-based quality improvement in healthcare**

Dr. med. Ute Seeland, Charité, Berlin, Germany
Prof. Dr. med. Vera Regitz-Zagrosek, Charité, Berlin, Germany

14H00 - 14H45 **Mainstreaming gender into healthcare: a European comparative view**

Dr. Ellen Kuhlmann, University of Frankfurt, Germany

coffee break

15H15 - 16H00 **Reflexions on "gender" in medical training and multidisciplinary team building to improve standards of care for intersex people in Lausanne (since 2005)**

Dr. Cynthia Kraus, University of Lausanne, Switzerland
Dr. med. Blaise-Julien Meyrat, University Hospital CHUV, Lausanne, Switzerland

16H00 - 16H45 **Integrating a gender perspective in medical curricula: the success story at Radboud University**

Prof. Dr. Toine Lagro-Janssen, Radboud University, The Netherlands

aperitif

Organisation: Carole Clair, Aurélien Georges (FBM) and Damien Michelet (PlaGe)
