

Master of Science in Behaviour, Evolution and Conservation Examination programme 2020-2021

MODULE 1	
Theoretical part	
Compulsory courses	Coefficients
Data Analysis	2
Introduction into Scientific Writing	2
Molecular Methods in Ecology and Evolution	5
Optional courses (choice of n courses among all proposed)	
Optional course 1	
Optional course 2	
Optional course n	
Final mark : Average weighted by coefficients of the grades for compulsory and optional courses (coefficients correspond to ECTS credits)	

MODULE 2
Practical part : First Step Project
Final mark : Arithmetic average of the grades for the practical assessments

Success conditions for modules 1 and 2

- Module 1 : final mark $\geq 4,0$ and no more than one grade under 4,0 in the compulsory and optional courses
- and**
- Module 2 : final mark $\geq 4,0$ and no more than one grade under 4,0

MODULE 3
Optional courses (choice of n courses among all proposed)
Optional course 1
Optional course 2
Optional course n
Optional courses (evaluation by credit) : each course is evaluated separately and credits are obtained if the final mark is $\geq 4,0$

Success conditions for module 3

To obtain at least 15 ECTS credits

MODULE 4
Master Thesis
Written report / oral defence / practical research work

Success conditions for module 4

Arithmetic average of the three grades on the Master Thesis Project $\geq 4,0$

According to the "Règlement d'études de la Maîtrise universitaire ès Sciences en comportement, évolution et conservation adopté par la Direction de l'UNIL le 15 mai 2017".
