

DBS SEMINAR 2024

PROGRAM

SEMINAR ROOM, BUGNON 7

Isabelle Arnoux

Collège de France

“A role for astrocytes in maternal behavior”

March 5th

João Relvas

Universidade do Porto

“Microglia homeostasis: insights from the cytoskeleton”

March 19th

Jennifer Westendorf

Mayo Clinic

“PHLPP Phosphatases and Injury-Induced Osteoarthritis”

April 22th

Michael Van Der Kooij

University Medical Center Utrecht

“Stress impacting metabolism and behavior”

April 23th

Birgitte Christensen

Aarhus University

“Effects of lithium on the kidney collecting duct”

May 7th

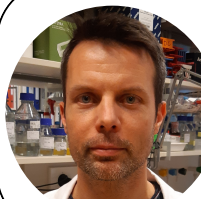

Marina Mapelli

European Institute of Oncology

“Decoding epithelial integrity: unveiling WNT dependent mechanisms for intervention in intestinal cancer”

May 21th

Benjamin Rothé

EPFL

“Flow-sensing by primary cilia: Dissecting the role of Biccl ribonucleoprotein particles”

June 4th

Ellen Blaak

NUTRIM School

“Microbial phenotype in the etiology of cardiometabolic disease: implications for precision nutrition”

June 18th

Gérard Karsenty

Columbia University Medical Center

“The impact of bone on whole-organism physiology: why and how?”

July 4th

Hiroki Ueda

University of Tokyo

“Towards Human Systems Biology of Sleep/Wake Cycles: Phosphorylation Hypothesis of Sleep”

July 9th

Erica Van de Waal

UNIL

“Lab cognition going wild: field experiments on wild vervet monkeys”

July 11th

Unil

UNIL | Université de Lausanne

Département des sciences
biomédicales
