

Master of Science in Molecular Life Sciences Examination programme 2022-2023

MODULE 1	
Theoretical part	
Compulsory courses	Coefficients
Sequence a Genome I	3
Write a Review	4
Optional courses (choice of n courses among all proposed)	
Optional course 1	
Optional course 2	
Optional course n	
Final mark : Average weighted by coefficients of the grades for compulsory and optional courses (coefficients correspond to ECTS credits)	

MODULE 2
Practical part : First Step Project
Final mark : Arithmetic average of the grades for the practical assessments

Success conditions for modules 1 and 2

- Module 1: final mark $\geq 4,0$ and no more than one grade under 4,0 in the compulsory and optional courses

and

- Module 2 : final mark $\geq 4,0$ and no more than one grade under 4,0

MODULE 3
Compulsory courses
Sequence a Genome II
Write a Fellowship
Optional courses (choice of n courses among all proposed)
Optional course 1
Optional course 2
Optional course n
Compulsory courses : Arithmetical mean of marks of compulsory courses Optional courses (evaluation by credit) : each course is evaluated separately and credits are obtained if the final mark is $\geq 4,0$

Success conditions for module 3

Arithmetical mean of marks of compulsory courses $\geq 4,0$ **and** obtain at least 9 ECTS credits with the optional courses

MODULE 4
Master Thesis
Written report / oral defence / practical research work

Success conditions for module 4

Arithmetic average of three grades on the Master Thesis $\geq 4,0$

According to the "Règlement d'études de la Maîtrise universitaire ès Sciences en sciences moléculaires du vivant approuvé par la Direction de l'UNIL le 22 juin 2021".
