

The Master program has a normal duration of 4 semesters and comprises 120 ECTS :

Module 1 : 15 ECTS : Compulsory Courses and one Interdisciplinary Course from the choice list

Module 2 : 15 ECTS : Practical Project

Module 3 : 40 ECTS : Compulsory Courses (7 ECTS) and Optional Courses (33 ECTS)

Module 4 : 50 ECTS : Personal Research Project

For specialisation Geosciences, Ecology and Environment (GEE), the student must :

- Obtain **30 ECTS** in the specialisation :

- Module 1 : 6 ECTS with Compulsory Courses (marked in pink) and one Interdisciplinary Course of the choice list (marked in green)

- Module 3 : 7 ECTS with Compulsory Courses (marked in pink) and

17 ECTS with Optional courses with Disciplinary (marked in pink) and Interdisciplinary (marked in green) Optional Courses

- Carry out the First Step Research Project (Module 2) and the Master Research Project (Module 4) in the field of Geosciences, Ecology and Environment, validated by the head of GEE specialisation

Training objectives are available in its programme regulations.

Specific training objectives: At the end of the course the students will be able to :

- Solve complex ecological problems through quantitative and modelling approaches, using complementary knowledge acquired in geosciences and environmental sciences

- Have an integrated view of natural systems and conduct interdisciplinary research projects in ecology / environment

- Transfer scientific knowledge and skills acquired to applied problems in the field of ecology, environment and conservation

The pandemic has shown us that circumstances beyond our control may require us to make the following adjustments / adaptations to study plans during the semester:

- possibility to switch from one mode of teaching to another (face-to-face <-> distance, synchronous <-> asynchronous, switch to co-modal teaching where it was not initially planned).
- change / modification of evaluation modalities, without inducing derogations from the Study Regulations (oral <-> written, exam <-> validation, individual work <-> group work, practical work <-> theoretical work, face-to-face evaluation <-> online evaluation, etc.)
- alternative or time-shifted modalities for teachings, internships, practical work, fieldworks and camps that could not take place or teachings that could no longer take place in the form initially planned.

Students are invited to consult this document regularly (Study Plan & Evaluation Procedure)

* - Before choosing a interdisciplinary optional course (marked in green), please check the "programme requirement" (prerequisites for the course) in the course description - Students can choose optional courses not included in this study plan for a max. of 4 ECTS. They can also obtain a maximum of 6 ECTS for a professional internship outside of Unil. Both are subject to prior approval of the head of the Master and will require a sufficient proof of completion
** For the courses "Aquatic Ecosystems : Glaciers, Rivers and Lakes (GSE)" and "Mountain streams: ecological processes and management (GSE)", you can choose only one of the two
*** Only if the course was not already taken as part of Module 1 in Semester 1
