

The clinical internship year is an important period to complete your training and reach the necessary level in order to succeed in the federal exam as described in the SCLO (Swiss Catalogue of Learning Objectives). This evaluation form is built according to the 7 Can-Meds roles used in the SCLO.

To take full advantage of this teaching, we invite you to set your objectives from the beginning of the internship with your internship supervisor. The evaluation of these specific objectives can be made in the H section.
