UNIL is a leading international teaching and research institution, with over 5,000 employees and 15,500 students split between its Dorigny campus, CHUV and Epalinges. UNIL and CHUV encourage excellence, individual recognition and responsibility.

The Faculty of Biology and Medicine (FBM) and the Lausanne University Hospital (CHUV) are inviting applications for a position of:

**Associate Professor and Senior Physician in the field of medical mycology**

**Starting date:** June 1st, 2022  
**Place:** Lausanne, Switzerland

This position is shared equally between the microbiology Service and the infectious diseases Service.

The Institute of Microbiology is one of the nine services of the Department of laboratory medicine and pathology of the CHUV. This 5-storey institute located on the hospital campus houses 10 active groups in microbiology, including 3 in the field of bacteriology (chlamydia, staphylococcus, pseudomonas), 3 in virology (HIV, hepatitisviruses, SARS-CoV-2 and other respiratory viruses) and 4 groups in mycology (Aspergillus, Candida, Pneumocystis, dermatophytes). The service also extends to the main hospital building (BH18 and 19 where some of the diagnostic activities are carried out).

The infectious diseases Service is part of the Department of Medicine and provides specialist services and advice to the CHUV, regional hospitals and resident physicians. It offers a rich and dynamic academic environment, close links with the clinical and basic science departments, state-of-the-art research infrastructure and equipment, and numerous opportunities for national and international collaborations.

The successful candidate will have a strong clinical and research record in medical mycology with a research focus on Candida or Aspergillus. Pre-graduate, post-graduate and continuing education in medical mycology will be provided in the School of Medicine and the School of Biology. She/he will participate in the on-call duty of the Infectious Diseases Department and the on-call duty of the Microbiology Department.

**Desired profile**

- Federal diploma in medicine or title recognized by the Federal Commission for Medical Professions (Mebeko), MD or MD-PhD
- FAMH specialist in diagnostic microbiology
- Physician with specialist title in infectious diseases (ISFM/FMH or recognised equivalent titles (Mebeko))
- Long experience in medical mycology at an academic level
- Internationally recognised research programme with expert funding
- Skills in interdisciplinary collaboration, as well as in administrative and human resources management
- Academic knowledge of professoral rank with proven practice in pre- and postgraduate teaching
- Good knowledge of French (LM or minimum B2, C1 ideal) or ability to acquire it quickly.

Further information may be obtained from Prof. Thierry Calandra (Thierry.Calandra@chuv.ch), Head of the infectious diseases Service and from Prof. Gilbert Greub (Gilbert.Greub@chuv.ch), Director of the Institute of microbiology and Head of the microbiology Service.

Applications, in English, will include a motivation letter, a curriculum vitae, a copy of the five most relevant publications, as well as names and contact information of three referees, a brief statement of research interests and teaching experience and a copy of diplomas. They should be submitted online by **February 6th, 2022 (23:59 GMT+1)** to wwwfbm.unil.ch/releve/application/ as a single PDF file.

The job description is available on the same link (or QR code).

We offer a pleasant working atmosphere in a multicultural, diverse and dynamic academic environment. There are possibilities for continuing professional education and a multitude of activities and other benefits to discover.

UNIL and CHUV are committed to promoting gender equality and diversity and strongly encourage applications from female candidates. www.unil.ch/egalite
