master of science (MSc) in behaviour, evolution and conservation

GENERAL OUTLINE

Objectives
The Master of Science in Behaviour, Evolution and Conservation is intended for students who wish to combine a thorough scientific training in ecology with the possibility of working with fauna, flora or microbes.

The Master program provides in-depth knowledge of the relations of living beings with their environment, the resources on which they depend and the dangers they face. It also provides advanced teaching on the evolution of organisms and their mechanisms of adaptation to changing biotic and abiotic environmental conditions.

This knowledge provides the foundations for evidence-based biodiversity management and conservation strategies.

Career prospects
This Master will help you develop many transversal skills: oral and written communication, critical, analytical and synthetic thinking, competences to carry out research, management of bibliographical resources and familiarisation with scientific literature, etc.

This panoply of skills, combined with specialist knowledge acquired during this Master, is excellent preparation for a wide range of professional sectors, including:
- Academic research
- Museums and conservation work
- Public and private research organisations
- Public environmental protection services
- Environmental protection
- Non Governmental Organizations (NGOs)
- Private applied ecology companies

EDUCATIONAL CONTENT

Description
The first semester of studies consists of compulsory and optional courses covering both conceptual and methodological aspects. The knowledge and skills acquired will be applied in the context of a small individual research project.

From the second semester the program consists of a personal Master research project, a field course and optional courses devoted to evolution, evolutionary genetics, animal behaviour and conservation biology. You can choose several courses in other Master’s programmes.

Possibilities of specialisation
Within the framework of the master, the student can follow the general programme or choose one of three specialisations: Behaviour, Evolution and Conservation (in collaboration with the Faculty of Business and Economics - HEC); Computational Ecology and Evolution; and Geoscience, Ecology and Evolution (in collaboration with the Faculty of Geosciences and Environment).

Some compulsory and optional courses will be common to all specialisations, while other compulsory and optional courses will be specific to the chosen specialisation.

Mobility
The Master research project can be conducted in a partner institution recognised by UNIL.

SYLLABUS

1st semester - 30 ECTS
Common study programme
- Concepts in Ecology
- Concepts in Evolution
- Data Analysis in Biology
- Molecular Methods in Ecology and Evolution
- Scientific Writing

Specific course depending of the specialisation:
- Microeconomics and Game Theory
- Spatial Analysis and Geographic information systems (GIS) in Ecology
- Advanced Python Programming

Personal short research project

2nd to 4th semester - 90 ECTS
40 ECTS
Choice of optional courses (including field courses within and outside Switzerland), seminars, exercises and practical work in:
- Evolution
- Conservation Biology
- Ecology
- Scientific Mediation
- Behavioural Ecology

Optional field courses
- Conservation Biology of Mediterranean Region
- Evolution and Biogeography of Semi-arid and Island Floras
- Mountain Ecosystems in the Alps

50 ECTS
Personal Master research project

PRACTICAL INFORMATION

Admission requirements
Candidates must be holders of a Bachelor of Science in Biology or in a field considered to be equivalent awarded by a Swiss university. Another degree awarded by a foreign university may be judged equivalent and give access to the Master’s degree programme, with or without further conditions.

Administrative information
Ms Almudena Vazquez
biologie-etudiants@unil.ch

Director of the programme
Prof. Tadeusz Kawecki
Tadeusz.Kawecki@unil.ch

Enrolment
Applications must be submitted to the Admissions Service before 30th April:
www.unil.ch/immat

Candidates requiring a visa to study in Switzerland: 28th February.

Start of courses
Mid-September. Academic calendar:
www.unil.ch/central/calendar

Part-time Master’s degree
Subject to certain conditions, Master’s studies can be followed part-time. In this case they correspond to semi-continuous studies (50%) for the entire duration of the course. For more details concerning the requisite conditions:
