

For students of exercise and sports science
Internship Performance Diagnostics from 1 November 2022 – 30 April 2023

Trainee Performance Diagnostics

Swiss Cycling has been one of the most successful Swiss sports federations for years. It is home to 8 different disciplines with a wide range of requirements. Are you interested in performance diagnostics in elite sport – to be involved when the best cyclists test their performance? In this case, we have the right internship for you.

Short description

- Assistance during the execution and evaluation of the annual cycling performance diagnostics
- Assistance and independent execution and evaluation of the powermeter calibration
- Insights into other areas of Swiss Cycling such as youth development, high-performance sport, or sports science

General learning objective

- In-depth insight into general and cycling-specific performance diagnostics
- Linking the basic physiological knowledge with practical experience
- Independent implementation of sub-projects in the departments of science, youth development and education
- Establishment of an own professional network, through contact with the various stakeholders in Swiss sport

Administration

- Start of internship
From November: 6 months
- Pensum: 100%
- Compensation: none
- Head: Lucas Schmid/Beat Müller
