PhD training and more

- More than 50 basic and advanced courses in many fields of neurosciences
  - Neurobiology
  - Morphology
  - Cellular Imaging
  - Structural and functional brain mapping
  - Modelling brain functions
- Plus: seminars, journal clubs and workshops
- Intermediate evaluations monitor candidates’ doctoral school and PhD project progress
- The Lemanic Neuroscience Annual Meeting (LNAM) fosters exchanges and interactions between junior and senior neuroscientists
- Travel grants support PhD candidates’ visits to international scientific meetings and workshops

Public outreach

- Annual Brain Awareness Week
- Exhibitions / Science nights
- Science events and hands-on brain experiences for children and adolescents
- Life Science Career Day: Job opportunities and career path inspiration for junior scientists

PhD candidates are working on thesis projects in

Lausanne
- Lausanne University Hospital (CHUV):
  - Dept. of Clinical Neurosciences
  - Dept. of Radiology
  - Dept. of Ophthalmology
- Lausanne University:
  - Dept. of Fundamental Neurosciences (DNF)
  - Center for Psychiatric Neuroscience (CNP)
  - Centre for Integrative Genomics (CIG)
  - Institute of Psychology (IP)
  - Dept. of Pharmacology and Toxicology (DPT)
  - Dept. of Physiology (DP)

Geneva
- Geneva University Hospital (HUG)
- University Medical Centre (CMU)
- Campus Biotech
- Geneva University:
  - Faculty of Medicine
  - Faculty of Psychology (FPSE)
  - Faculty of Science

Fribourg
- University Hospital, Dept. of Medicine
- Faculty of Psychology

Graduates

More than 200 PhD candidates graduated since May 2005. Social media networks and meetings foster contacts between LN alumni and current PhD candidates. Once per year, LN alumni share their job experiences and give hands-on advice on career development at the Life Science Career Day.
