Due to changes in the sanitary situation related to COVID-19, the study plans may be adapted during the semester as follows:

- Possibility to switch from one mode of teaching to another (face-to-face, distance, synchronous -asynchronous, switch to co-modal teaching where it was not initially planned).
- adaptation of evaluation modalities, without inducing derogations from the Study Regulations (oral - written, examination - validation, individual work - group work, practical work - theoretical work, face-to-face evaluation - online evaluation, etc.).
- alternative or time-shifted modalities for teachings, internships, practical work, fieldwork and camps that could not take place or teachings that could no longer take place in the form initially planned.

Students are invited to regularly consult the syllabi, timetables and their emails.
