100% post-doctoral position on human memory disorders

Job Description

A postdoctoral position is available at the Laboratory of Cognitive Neurorehabilitation, Department of Clinical Neurosciences, University Hospital in Geneva.

Topic: Human memory disorders: amnesia and confabulation. We explore people with brain-damage and seek to understand the mechanisms and anatomical basis using lesion-symptom mapping and high-density evoked potential methods.

Profession / degree: Doctoral degree in a field of human neuroscience (e.g., psychology, neuroscience). Bachelor or Master in psychology is advantageous.

Special requirements: Experience with analysis of high-density EEG (e.g., CarTool), structural image analysis, and experience with the cognitive exploration of brain-damaged subjects.

Languages: Good conversational French; good written English.

Start: July/August 2017
Duration: 3 to 5 years

Deadline for submission of candidacy: 10 April 2017
